About Me

Educational Experience

2+ years

Frontend Development

Education

Bachelor of Computer Science

I'm a **Software Developer** from India, I build apps with focus on **HTML5, CSS3, JavaScript** considering all the aspects of **UI/UX Design**. I enjoy turning complex problems into simple, beautiful and intuitive designs. A **Software Designer** who has an experience of building high-performing, responsive, creative web applications to deliver a unique, intriguing user experience that works, also keen interest in **UI/UX** with some crisp designing skills.

I am a well-trained teammate who loves to share ideas and prioritizes communication in order to achieve goals within the set deadlines. I enjoy being challenged and working upon projects that requires me to step outside of my comfort zone.
